

## Aims and Scope

The new IBRACON Structural Journal is a technical and scientific divulgation vehicle of IBRACON (Brazilian Concrete Institute). Each issue of the periodical will have 5 to 8 papers and, possibly, a technical note and a technical discussion of a previously published paper. All contributions will be reviewed and approved by the Board of Reviewers.

## Objectives

The IBRACON Structural Journal has as main objectives:

- Present the current developments and advances in the area of structural concrete;
- Make possible the better understanding of structural concrete behavior, supplying subsidies for a continuous interaction among researchers, producers and users;
- Stimulate the development of scientific and technological research in the area of structural concrete, through papers peer-reviewed by a qualified Editorial Board;
- Promote the interaction among researchers, constructors and users of concrete and the development of Civil Construction;
- Provide a vehicle of communication of high technical level for researchers and designers in the area of structural concrete.

## Submission Procedure

The procedure to submit and revise the contributions, as well as the formats, will be detailed on IBRACON's WebSite ([www.ibracon.org.br](http://www.ibracon.org.br)). The papers and the technical notes will be revised by at least three reviewers indicated by the editors. The discussions and replies will be accepted for publication after a revision by the editors and at least one member of the Editorial Board. In case of disagreement between the reviewer and the authors, the contribution will be sent to a specialist in the area, not necessarily linked to the Periodical Board.

For each non-member author of a submitted paper a submission fee will be charged. This fee will not be refunded, if the paper comes to be rejected. Initially this fee is established to be US\$10,00 (ten dollars) or R\$ 30,00 (Thirty Reais).

## Contribution Types

The periodical will publish original papers, short technical notes and paper discussions. Announcements of conferences and meetings, information about book reviews, events and contributions related to the area will also be available in the periodical WebSite. All contributions will be revised and only published after the Editorial and Reviewers Boards approve the paper. Restrictions of content and space (size) are imposed to the papers. The contributions will be accepted for revision in Portuguese, Spanish or English. The abstracts are strongly recommended to be presented in Portuguese, or Spanish, and in English, independent of the language, in which the paper is written. Preference is given to contributions in English. After the process of review and translation the papers originally written in Portuguese or Spanish will also be published in English.

Original papers will be accepted as long as they are in accordance with the objectives of the periodical and present quality of information and presentation. The instructions to submit a paper are detailed in the template (available on IBRACON's WebSite). The length of the papers must not exceed 20 pages.

The technical note is a brief manuscript. It may present a new feature of research, development or technological application in the areas of Structural Concrete and Civil Construction. It is an opportunity to be used by industries, companies, universities, institutions of research, researchers and professionals willing

to promote their works and products under development. The instructions to submit a technical note are detailed on IBRACON's WebSite.

The discussion will be received at least after 3 months the publication of a paper or technical note to which it refers to. The instructions to submit a discussion are detailed on IBRACON's WebSite. The discussion must not have to be offensive and must be limited to the topic addressed in the published paper. The right of reply will be guaranteed to the Authors. The discussions and the replies will be published in the subsequent issues of the periodical.

## Internet Access

IBRACON Structural Journal Page in <http://www.ibracon.org.br>

## Subscription rate

All IBRACON members will have free access to the periodical contents through the Internet. Non-members will have limited access to the published material, but will be able to purchase isolated issues through the Internet. The financial resources for the periodical support will be provided by IBRACON and by research funding agencies. The periodical will not receive any type of private advertisement that can jeopardize the credibility of the publication.

## Photocopying

Photocopying in Brazil. Brazilian Copyright Law is applicable to users in Brazil. The publisher holds the copyright of contributions in the journal unless stated otherwise at the bottom of the first page of an contribution. Where the publisher holds the copyright, authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted for libraries and other users registered at IBRACON.
