Contents

Shear and concrete tensile strength in the design concept of strut-and-tie models Karl-Heinz Reineck	
Comparative analysis of design code criteria for shear strength of reinforced concrete beams J. M. F. Calixto and A. B. Ribeiro	
Behavior of flat slabs using internal studs as shear reinforcement L. B. Trautwein, T. N. Bittencourt, R. B. Gomes and J. C. Dellabella	
Experimental analysis of precast slabs with lattice trusses strengthened by concrete overlay C. E. R. Assis, R. B. Gomes and G. N. Guimarães	
Evaluation of concrete compression strength of precast beams submitted to steam curing by the maturity method L. D. P. Peres, M. P. Barbosa and R. C. A. Pinto
